

Architectures and Frameworks for Developing and Applying Blockchain Technology

Part of the Advances in Systems Analysis, Software Engineering, and High Performance Computing Book Series

Nansi Shi (Logic International Consultants, Singapore)

Description:

The blockchain revolution has drastically impacted global economics and the strategic practices within different industries. Cryptocurrency specifically has forever changed the face of business and the implementation of business online. While innovative, people are still in the early stages of building and developing blockchain technology and its applications, and it is critical that researchers and practitioners obtain a better understanding of this global phenomenon.

Architectures and Frameworks for Developing and Applying Blockchain Technology is an essential reference source that presents the technological foundation, recent research findings, developments, and critical issues associated with blockchain technology from both computer science and social science perspectives. Featuring topics such as artificial intelligence, digital economy, and network technology, this book is ideally designed for academics, researchers, industry leaders, IT consultants, engineers, programmers, practitioners, government officials, policymakers, and students.

ISBN: 9781522592570

Release Date: June, 2019

Copyright: 2019

Pages: 380

Topics Covered:

- Artificial Intelligence
- Big Data
- Cryptocurrency
- Data Privacy
- Decentralized System
- Digital Economy
- Distributed Computing
- Mobile Computing
- Network Technology
- Social Media
