## Innovative Document Summarization Techniques: Revolutionizing Knowledge Understanding

Part of the Advances in Data Mining and Database Management Book Series

Alessandro Fiori  
(IRCC, Institute for Cancer Research and Treatment, Italy)

The prevalence of digital documentation presents some pressing concerns for efficient information retrieval in the modern age. Readers want to be able to access the information they desire without having to search through a mountain of unrelated data, so algorithms and methods for effectively seeking out pertinent information are of critical importance.

**Innovative Document Summarization Techniques: Revolutionizing Knowledge Understanding** evaluates some of the existing approaches to information retrieval and summarization of digital documents, as well as current research and future developments. This book serves as a sounding board for students, educators, researchers, and practitioners of information technology, advancing the ongoing discussion of communication in the digital age.

### Topics Covered:

- Evaluation Methods
- Interactive Systems
- Document Analytics
- Multi-document Summarization
- Multilingual Summarization Approaches
- Social Network Integration
- Software Platforms
- Translation
