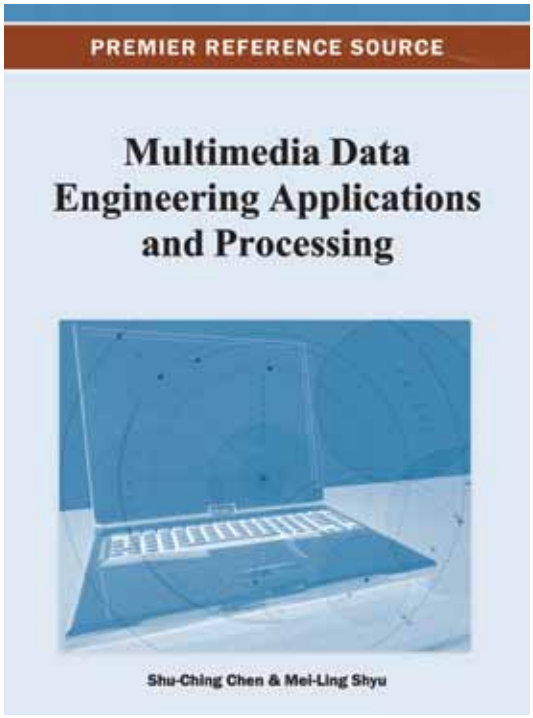
An Excellent Addition to Your Library!

Released: February 2013



ISBN: 9781466629400; © 2013; 328 pp.
Print: US $190.00 | Perpetual: US $285.00 | Print + Perpetual: US $380.00

Pre-pub Discount:*
Print: US $180.00 | Perpetual: US $270.00
* Pre-pub price is good through one month after publication date.

Multimedia Data Engineering Applications and Processing

Shu-Ching Chen (Florida International University, USA) and
Mei-Ling Shyu (University of Miami, USA)

With a variety of media types, multimedia data engineering has emerged as a new opportunity to create techniques and tools that empower the development of the next generation of multimedia databases and information systems.

Multimedia Data Engineering Applications and Processing presents different aspects of multimedia data engineering and management research. This collection of recent theories, technologies, and algorithms brings together a detailed understanding of multimedia engineering and its applications. This reference source will be of essential use for researchers, scientists, professionals, and software engineers in the field of multimedia.

Topics Covered:

- Content-Based Retrieval
- Multimedia Date Management
- Multimodal Information Integration
- Network Support for Multimedia Data
- Relevance Feedback
- Security Support
- Technologies and Applications

Market: This premier publication is essential for all academic and research library reference collections.
It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Shu-Ching Chen is a Full Professor in the School of Computing and Information Sciences (SCIS), Florida International University (FIU), Miami since August 2009. Prior to that, he was an Assistant/Associate Professor in SCIS at FIU from 1999 to 2009. He received a Master's degrees in Computer Science, Electrical Engineering, and Civil Engineering in 1992, 1995, and 1996, respectively, and a Ph.D. degree in Electrical and Computer Engineering in 1998, from Purdue University, West Lafayette, IN, USA. He is the Director of Distributed Multimedia Information Systems Laboratory and Associate Director of The Center for Advanced Distributed System Engineering at SCIS. His main research interests include content-based image/video retrieval, distributed multimedia database management systems, multimedia data mining, multimedia systems, and Disaster Information Management. Dr. Chen has authored and coauthored more than 240 research papers in journals, refereed conference/symposium/workshop proceedings, book chapters, and one book. Dr. Chen received the best paper award from 2006 IEEE International Symposium on Multimedia. He was awarded the IEEE Systems, Man, and Cybernetics (SMC) Society's Outstanding Contribution Award in 2005, and was the co-recipient of the IEEE Most Active SMC Technical Committee Award in 2006. He was also awarded the Inaugural Excellence in Graduate Mentorship Award from FIU in 2006, the University Outstanding Faculty Research Award from FIU in 2004, the Excellence in Mentorship Award from SCIS in 2010, the Outstanding Faculty Service Award from SCIS in 2004, and the Outstanding Faculty Research Award from SCIS in 2002. He has been a General Chair and Program Chair for more than 35 conferences, symposiums, and workshops. He is the founding Editor-in-Chief of *International Journal of Multimedia Data Engineering and Management* and Associate Editors/Editorial Board for other 13 journals. He is the Chair of IEEE Computer Society Technical Committee on Multimedia Computing and Co-Chair of IEEE Systems, Man, and Cybernetics Society's Technical Committee on Knowledge Acquisition in Intelligent Systems. Dr. Chen also has been a guest editor for more than ten journal special issues. He is a steering committee member of IEEE Transactions on Multimedia. He also serves/served as a member of technical program committee for more than 200 professional meetings. He is a fellow of SIRI

Section 1: Multimedia Content Analysis

Chapter 1
Content-Based Keyframe Clustering Using Near Duplicate Keyframe Identification
Younessian Ehsan (Nanyang Technological University, Singapore)
Rajan Deepu (Nanyang Technological University, Singapore)

Chapter 2
Authorship Detection and Encoding for eBay Images
Zhou Liping (The University of Alabama at Birmingham, USA)
Chen Wei-Bang (The University of Alabama at Birmingham, USA)
Zhang Chengcui (The University of Alabama at Birmingham, USA)

Chapter 3
Multimodal Information Integration and Fusion for Histology Image Classification
Meng Tao (University of Miami, USA)
Shyu Mei-Ling (University of Miami, USA)
Lin Lin (University of Miami, USA)

Chapter 4
Default Reasoning for Forensic Visual Surveillance Based on Subjective Logic and its Comparison with L-Fuzzy Set Based Approaches
Han Seunghan (Technische Universität München, Germany)
Stechele Walter (Technische Universität München, Germany)

Section 2: Multimedia Content Management

Chapter 5
Navigating through Video Stories Using Clustering Sets
Pinto-Cáceres Sheila M. (University of Campinas, Brazil)
Almeida Jurandy (University of Campinas, Brazil)
Neris Vânia P. A. (Federal University of Sao Carlos, Brazil)
Baranauskas M. Cecília C. (University of Campinas, Brazil)
Leite Neucimar J. (University of Campinas, Brazil)
Torres Ricardo da S. (University of Campinas, Brazil)

Chapter 6
Utilizing Context Information to Enhance Content-Based Image Classification
Zhu Qiusha (University of Miami, USA)
Lin Lin (University of Miami, USA)
Shyu Mei-Ling (University of Miami, USA)
Liu Dianting (University of Miami, USA)

Chapter 7
Hybrid Query Refinement:
Chatterjee Kasturi (Florida International University, USA)
Chen Shu-Ching (Florida International University, USA)

Chapter 8
3D Model-Based Semantic Categorization of Still Image 2D Objects
Petre Raluca-Diana (TELECOM SudParis and Alcatel-Lucent Bell Labs, France)
Zaharia Titus (TELECOM SudParis and UMR CNRS 8145 MAP5, France)

Section 3: Multimodal Content Retrieval

Chapter 9
Building Multi-Modal Relational Graphs for Multimedia Retrieval
Shieh Jyh-Ren (National Taiwan University, Taiwan)
Lin Ching-Yung (IBM T. J. Watson Research Center, USA)
Wang Shun-Xuan (National Taiwan University, Taiwan)
Wu Ja-Ling (National Taiwan University, Taiwan)

Chapter 10
Client-Side Relevance Feedback Approach for Image Retrieval in Mobile Environment
Yu Ning (University of Central Florida, USA)
Hua Kien A. (University of Central Florida, USA)
Liu Danzhou (Symantec Corporation, USA)

Chapter 11
Video Segmentation and Structuring for Indexing Applications
Tapu Ruxandra (TELECOM SudParis, France)
Zaharia Titus (TELECOM SudParis, France)

Chapter 12
Constructing and Utilizing Video Ontology for Accurate and Fast Retrieval
Shirahama Kimiaki (Kobe University, Japan)
Uehara Kuniaki (Kobe University, Japan)

Section 4: Multimedia Delivery and Applications

Chapter 13
A Real-Time 3D Visualization Framework for Multimedia Data Management, Simulation, and Prediction:
Rossol Nathaniel (University of Alberta, Canada)
Cheng Irene (University of Alberta, Canada)
Jamal Iqbal (AQL Management Consulting Inc., Canada)
Berezowski John (Food Safety and Animal Health Division, Government of Alberta, Canada)
Basu Anup (University of Alberta, Canada)

Chapter 14
A Cross-Layer Design for Video Streaming Over 802.11e HCCA Wireless Network
Luo Hongli (Indiana University-Purdue University Fort Wayne, USA)

Chapter 15
A Novel Strategy for Recommending Multimedia Objects and its Application in the Cultural Heritage Domain
Albanese Massimiliano (George Mason University, USA)
d'Acierno Antonio (ISA, National Research Council, Italy)
Moscato Vincenzo (University of Naples, Italy)
Persia Fabio (University of Naples, Italy)
Picariello Antonio (University of Naples, Italy)
