

Human Agro-Energy Optimization for Business and Industry

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Pandian Vasant (MERLIN Research Center, TDTU, Vietnam)

Description:

In the current era, there are many environmental and energy challenges facing the agricultural sector, which negatively impact the climate, business, industry, and society. Through modern technologies and engineering, however, these challenges are now able to be met with solutions. There is a need for research in this area so that the industry can continue to be sustainable.

Human Agro-Energy Optimization for Business and Industry presents research on humanized optimization approaches for smart energy and the agro-business industry. It is a critical scholarly resource that examines the efficient use of modern smart farming and renewable energy sources, which have a positive impact on sustainable development. Covering topics such as biomass characterization, energy efficiency, and sustainable development, this premier reference source is an essential resource for agricultural scientists, engineers, government officials, software developers, managers, business leaders, executive officers, students and educators of higher education, librarians, researchers, and academicians.

ISBN: 9781668441183

Pages: 300

Copyright: 2023

Release Date: January, 2023

Hardcover: \$240.00

Softcover: \$165.00

E-Book: \$240.00

Hardcover + E-Book: \$290.00

Topics Covered:

Aeroponics
Aquaponics
Biomass Characterization
Energy Efficiency
Floating Solar Power Plant

Hydroponics
IoT-Based Smart Farming
Renewable Energy Systems
Sustainable Development
Weather Characterization

Subject: Environmental, Agricultural, and Physical Sciences

Classification: Edited Reference

Readership Level: Advanced-Academic Level (Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
