

# International Journal of Technological Innovation and Social Dynamics (IJTISD)

ISSN: 2640-9976; EISSN: 2640-9984

Established 2018; Published Semi-Annually

**Editor(s)-in-Chief:** Michael B. Knight (Florida Southern College, USA)

The International Journal of Technological Innovation and Social Dynamics (IJTISD) provides an international forum for practitioners and researchers from social sciences, as well as information systems professional practitioners, to contribute and share developed, useful, and innovative research regarding the impact and future of technologies in the workplace. Much of this research relates to the implementation and use of Information and Communication Technologies (ICT), as these inevitably involve interactions between technology and people. It also provides content relating to the use of Actor-Network Theory as a means of understanding various socio-technical phenomena and provides examples and case studies of technological innovation. Covering all aspects of social issues impacted by information technology in organizations and inter-organizational structures, IJTISD presents the conceptualization of specific social issues and their associated constructs.

## Individual Price:

Print: US \$295

E-Journal: US \$295

Print + E-Journal: US \$360

## Institution Price:

Print: US \$840

Online Access: US \$840

Print + Online Access: US \$1,015

## Topics Covered:

- Actor Network Theory (ANT)
- Assimilation of emerging technologies
- Asynchronous learning networks
- Behavioral issues in IS security
- Contributions from information systems to the development of other academic disciplines
- Cultural customs and digital divides
- Development of information systems subspecialties
- Distributed projects
- Electronic monitoring of employees
- Gender, race, age, education, and socio-economic differences in IT
- Impartiality of data utilization
- Information technology as a means for increasing social capital
- Innovation translation as an approach to explaining technological innovation
- Intellectual Property Rights
- IS security design and management methods
- IT for transformation and wealth creation
- Management structures
- Misrepresentation in digital media
- Misuse of data
- Modeling Techniques
- Models for IS security implementation
- Morality in information systems
- Networking and collaboration
- Policy implementation
- Politics
- Power asymmetry
- Process changes
- Relationships between the information systems area and other academic disciplines
- Reporting new developments in other reference disciplines
- Research between the IS system areas and other established fields
- Security culture & awareness issues
- Social barriers
- Social Capital
- Social environments
- Social network knowledge
- Social, legal, and ethical of IS security
- Standards, laws, and regulations
- Strategic management issues in IS security
- Trust issues in IS Security
- Urban and community informatics
- Virtual teams
- Virus/worm creation

## SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at [www.igi-global.com/publish/resources](http://www.igi-global.com/publish/resources) prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:  
**Michael B. Knight, IJTISD@igi-global.com**
