

Handbook of Research on Innovative Digital Practices and Globalization in Higher Education

Part of the Advances in Higher Education and Professional Development Book Series

Jared Keengwe (University of North Dakota, USA)

Description:

We are moving toward a future in which digital practices are becoming more ubiquitous. Also, there is evidence to suggest that innovative digital practices are changing the face of 21st-century learning environments. Critical to 21st-century teaching and learning success is continued emphasis on learner preferences, shaped by innovative digital technology-driven learning environments alongside teacher awareness, knowledge, and preparedness to deliver high-impact instruction using active learning pedagogies. Thus, the purposeful and selective use of digital learning tools in higher education and the incorporation of appropriate active learning pedagogies are pivotal to enhancing and supporting meaningful student learning.

Handbook of Research on Innovative Digital Practices and Globalization in Higher Education explores innovative digital practices to enhance academic performance for digital learners and prepare qualified graduates who are competent to work in an increasingly global digital workplace. Global competence has become an essential part of higher education and professional development. As such, it is the responsibility of higher education institutions to prepare students with the knowledge, skills, and competencies required to compete in the digital and global market. Covering topics such as design thinking, international students, and digital teaching innovation, this major reference work is an essential resource for pre-service and in-service teachers, educational technologists, instructional designers, faculty, administrators, librarians, researchers, and academicians.

ISBN: 9781668463390

Pages: 335

Copyright: 2023

Release Date: March, 2023

Hardcover: \$270.00

E-Book: \$270.00

Hardcover +

E-Book: \$325.00

Topics Covered:

21st-Century Skills

Blended Learning Environments

Computational Thinking

Design Thinking

Digital Literacy

Digital Teaching Innovation

Global Citizenship

International Students

Product Design

Psychometric Properties

Self-Directed Learning

Student Course Evaluation

Visual Cultural Arts

Subject: Education

Classification: Handbook of Research

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
