N. Garipidis (Aristotle University of Thessaloniki, Greece)

The creation of a new public realm through the use of the Internet and ICT may positively promote political liberties and freedom of speech, but could also threaten the political and public autonomy of the individual.

Human Rights and the Impact of ICT in the Public Sphere: Participation, Democracy, and Political Autonomy focuses on the new technological era as an innovative way to initiate democratic dialogue, but one that can also endanger individual rights to freedom, privacy, and autonomy. This reference book focuses on the new opportunities technology offers for political expression and will be of use to both academic and legal audiences, including academics, students, independent authorities, legislative bodies, and lawyers.

Topics Covered:

- Cyberspace
- Democracy
- Freedom of Speech
- Globalization
- Human Rights
- ICT
- Political Autonomy
- Privacy
- Public Sphere
