Part of the Advances in Wireless Technologies and Telecommunication Book Series

Ramona Trestian (Middlesex University, UK) and
Gabriel-Miro Muntean (Dublin City University, Ireland)

In the ever-evolving telecommunication industry, technological improvements alone are not able to keep up with the significant growth of mobile broadband traffic. As such, new research on communications networks is necessary to keep up with rising demand.

Convergence of Broadband, Broadcast, and Cellular Network Technologies addresses the problems of broadband, broadcast, and cellular coexistence, including the increasing number of advanced mobile users and their bandwidth demands. This book will serve as a link between academia and industry, serving students, researchers, and industry professionals.

Topics Covered:

- Wireless Sensor Networks
- Energy Harvesting
- Cognitive Radios
- Collaboration in Future Networks
- Competition in Next Generation Networks
- Economic Aspects of Heterogeneous Networks
- Interference Mitigation in Heterogeneous Networks
- Optical Fibre Distribution in Future Networks
- Resource Allocation in Heterogeneous Networks
- Smart Cities and Roads

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.
