Part of the Advances in Electronic Government, Digital Divide, and Regional Development

Zaigham Mahmood  
(University of Derby, UK & North West University, South Africa)

The emergence of e-government allows for effective governance, increased transparency, better management, and efficient services through the use of the internet and information and communication technologies. Therefore, world governments are mobilizing large amounts of resources in order to implement and promote the use of e-government.

**Developing E-Government Projects: Frameworks and Methodologies** presents frameworks and methodologies for strategies towards the design, implementation, and adoption of e-government projects. By providing best practices in the successful adoption of e-government, this book is essential for policy makers, practitioners, researchers, and students interested in the approaches utilized for the successful implementation of e-government projects.

### Topics Covered:

- E-Government Adoption
- E-government Strategies
- Government to Government Interactions
- ICT Infrastructure
- Knowledge Management
- Managing E-Governance
- Social and Economic Development
- Success Factors

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

**Zaigham Mahmood** is a researcher and author. He has an M.Sc. in Mathematics, M.Sc. in Computer Science, and Ph.D. in Modelling of Phase Equilibria. Dr Mahmood is a Senior Technology Consultant at Debasis Education UK, a researcher at the University of Derby UK, and Professor Extraordinaire at the North West University in South Africa.
