

Green Accounting and Digitalization of E-Business for Sustainable Development

Shakhlo T. Ergasheva (Tashkent State University of Economics, Uzbekistan)

Description:

Green accounting and digitalization are promising vectors of the sustainable development of e-business, modernizing the experience of e-business. They enhance sustainable development in various sectors of the economy, including agriculture, energy, higher education, and logistics. They also contribute to the sustainable development of international territories. As a result, the practice of sustainable development management may be improved through systemic digitalization and green accounting, bridging the gap between technological modernization and the ecologization of e-business activities.

Green Accounting and Digitalization of E-Business for Sustainable Development discusses the international experience of digitalization and green accounting of e-business. It offers a comprehensive scientific concept of digital technologies for green accounting automation and sustainable development practices in e-business. Covering topics such as forecasting tools, investment attractiveness, and decarbonization, this book is an excellent resource for business managers, sustainability experts, regulators, policymakers, accountants, researchers, academicians, and more.
