

Theory of Shocks, COVID-19, and Normative Fundamentals for Policy Responses

Part of the Advances in Finance, Accounting, and Economics Book Series

Olga Ivanovna Pilipenko (The Russian Presidential Academy of National Economy and Public Administration, Russia), Zoya Andreevna Pilipenko (Bank of Russia, Russia) and Andrey Igorevich Pilipenko (The Russian Presidential Academy of National Economy and Public Administration, Russia)

Description:

The phenomenon of shocks is often mentioned in relation to economic crises but rarely studied. This gap in research has resulted in shocks being poorly understood, with no fundamental explanation of their inciting conditions. It is a system-forming problem that cannot be investigated without dynamic ideas about the economy, but an incomplete understanding of this event leaves economic systems vulnerable to collapse.

Theory of Shocks, COVID-19, and Normative Fundamentals for Policy Responses is an essential publication that explores the factors that cause economic shocks and the mechanisms of their implementation. The book serves as a resource for the development of policy-oriented frameworks for achieving and maintaining national and international strategies to properly manage future global shocks. Featuring coverage of a wide range of topics including dialectics, self-evolvement, and structural relationships, this book is ideally designed for economists, executives, managers, entrepreneurs, academicians, students, and researchers in the areas of finance, macroeconomics, economic theory, and risk assessment.

ISBN: 9781799843092

Pages: 300

Copyright: 2021
