

Supply Chain Strategies and the Engineer-to-Order Approach

Part of the Advances in Logistics, Operations, and Management Science Book Series

Richard Addo-Tenkorang (University of Vaasa, Finland), Jussi Kantola (University of Vaasa, Finland), Petri Helo (University of Vaasa, Finland) and Ahm Shamsuzzoha (Sultan Qaboos University, Oman)

Description:

With the rise of global competitiveness among industries, it has become increasingly vital to develop novel strategies to assist in optimizing valuechain networks, thus helping to secure economic success. By employing engineer-to-order practices, many enterprises have improved their manufacturing processes.

Supply Chain Strategies and the Engineer-to-Order Approach evaluates innovative processes and original operational models, frameworks, and architectures in the topic areas of industrial engineering and management science. Features optimized enterprise chain management strategies and emergent research within the field.

Readers:

This book is an essential reference source for professional, academics, and researchers specializing in enterprise operations and engineer-to-order procedures.

ISBN: 9781522500216

Release Date: April, 2016

Copyright: 2016

Pages: 300

Topics Covered:

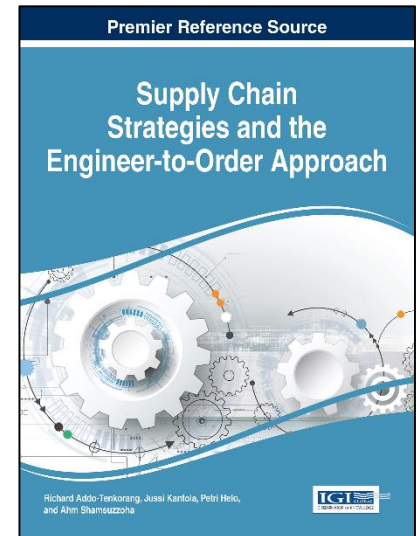

- Complex Product Development
- Global Industrial Enterprises
- Global Manufacturing
- Industrial Engineering
- Innovation Diffusion
- Operational Architectures
- Optimization Process

Table of Contents

Foreword
Preface
Acknowledgment

Section 1

Information Communication Systems in Supply-Chain Management Engineering-to-Order.

Chapter 1

Information Systems as the key Enabler in Engineer-to-Order Supply Chain Management
Arun Nambiar, California State University – Fresno, USA

Chapter 2

Improving Communication with Internal Public and Customers of an Industrial Company - a Major Challenge along Supply Chain
Florea Nicoleta Valentina, Valahia University of Targoviste, Romania
Tanasescu Irina Antoaneta, Valahia University of Targoviste, Romania

Chapter 3

Engineer-To-Order Product Development: A Communication Network Analysis for Supply-Chain's Sustainable Competitive Advantage.
Richard Addo-Tenkorang, University of Vaasa, Faculty of Technology, Finland
Petri T Helo, University of Vaasa, Faculty of Technology, Finland
Jussi I Kantola, University of Vaasa, Faculty of Technology, Finland

Section 2

Models and Modelling in Supply-Chain Management and Engineering-to-Order Processes

Chapter 4

Improving Construction Supply Chains through Collaborative Modelling, a case of South Africa: Construction Supply Chain & Collaboration Modeling
Clinton Aigbavboa, University of Johannesburg, South Africa
Neo Malose Masemeni, University of Johannesburg, South Africa
Wellington Thwala, University of Johannesburg, South Africa

Chapter 5

Innovation Diffusion in the European Ceramic Tile Industry Supply Chain
Daniel Gabaldón-Estevan, University of Valencia, Spain

Chapter 6

Modeling and Synthesis of Supply Chain Networks using High-Level Petri Nets
Gen'ichi Yasuda, Nagasaki Institute of Applied Science, Japan

Chapter 7

The Production Capacity Planning and Scheduling Models in Term of Supply Chain Management
Dušan Malindžák, Technical University of Košice, Slovakia
Peter Kacmary, Technical University of Kosice, Slovakia

Section 3

Resilience and Risk within Engineer-to-Order Supply-Chain Management Businesses.

Chapter 8

Management of Risk and Resilience within Collaborative Business Network
Ahm Shamsuzzoha, Sultan Qaboos University, Oman

Section 4

Strategies in Supply-Chain Management and Engineering-to-Order Processes.

Chapter 9

Supply Chain Design Approaches for Dual Demand Management Strategies
Can Celikbilek, Ohio University, USA
Gürsel A. Süer, Ohio University, USA

Chapter 10

Hybrid Supply Chain Strategies in Wind Business
Jordi Castelló, Universitat de Girona, Spain
Rodolfo de Castro, Universitat de Girona, Spain
Andrea Bikfalvi, Universitat de Girona, Spain

Chapter 11

Physical and Digital Integration Strategies of Electronic Device Supply Chains and Their Applicability to ETO Supply Chains.
Claudia-Maria Wagner, Dublin Institute of Technology (DIT), Ireland
Colm Ryan, Dublin Institute of Technology (DIT), Ireland

About the Contributors

Index

Richard Addo-Tenkorang is a postdoctoral research fellow (docent) with the Industrial Engineering and Management Unit – Department of Production; University of Vaasa, Finland. He was recently offered an Industrial and Manufacturing Engineering (IME) Lectureship position with the Engineering and Technology College, Botswana International University of Science and Technology (BIUST). His research interests are in the area of ERP – SCM – IT system-solutions and Concurrent Engineering for New/Complex Product Development, as well as Logistics and Supply-Chain Management (L&SCM) projects.
