

# AI in Finance, Business, and Organizational Decision-Making:

Sara Elouadi, (Hassan II University of Casablanca, Morocco)

Hicham El Bouanani, (Hassan II University of Casablanca, Morocco)

## Description:

Artificial intelligence is rapidly transforming how organizations make decisions, allocate resources, and respond to uncertainty. What was once viewed primarily as a technological innovation has become a strategic capability that influences financial performance, competitive positioning, and organizational effectiveness. As businesses operate in increasingly complex and data-rich environments, leaders are turning to AI-driven insights to support faster, more informed decision-making. At the same time, the growing reliance on intelligent systems raises important questions about transparency, accountability, human judgment, and the future role of decision-makers. Understanding how AI can enhance decision quality while preserving organizational trust and strategic oversight has become a critical challenge for modern institutions.

**AI in Finance, Business, and Organizational Decision-Making** explores the evolving role of artificial intelligence in shaping financial analysis, business strategy, operational management, and organizational leadership. This book examines both the opportunities and challenges associated with AI-enabled decision processes, emphasizing the balance between technological capability and human expertise. Bringing together theoretical perspectives, empirical research, and practical applications, this book highlights how organizations can leverage AI to improve performance while navigating issues of governance, ethics, risk, and accountability. Covering topics such as AI-enhanced credit approval systems, investor behavior, and anomaly detection, this book is a fundamental academic resource for graduate and doctoral students, business leaders, executives, managers, organizational decision-makers, financial analysts, investment professionals, risk managers, data scientists, business intelligence professionals, policymakers, and more.

**ISBN:** 9798260027066 **Pages:** 475 **Copyright:** 2026 **Release Date:** 7/10/2026

**Hardcover:** \$240 **Softcover:** \$200 **E-Book:** \$230 **Hardcover + E-Book:** \$240

## Topics Covered:

- AI-Driven Pricing Models
- AI-Enhanced Credit Approval System
- Anomaly Detection
- Artificial Intelligence (AI)
- Finance
- Forecasting Techniques
- Index-Linked Public Expenditure
- Investor Behavior
- Managerial Feedback
- Organizational Decision-Making
- Stochastic Simulation Model

**Subject:** Business and Management

**Readership Level:** Advanced-Academic Level (Research Recommended)

**Classification:** Edited Research

**Research Suitable For:** Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
