

Developments and Approaches in Science Diplomacy: Latin America and the Caribbean

Part of the Advances in Electronic Government, Digital Divide, and Regional Development Book Series

Luisa Fernanda Echeverría-King (Universidad Simon Bolivar, Colombia), Branislav Pantović (UNIVERSIDAD NACIONAL DE RÃ O NEGRO, Argentina), Rafael Enrique Pineros-Ayala (Universidad Externado de Colombia, Colombia), Pedro Figueroa (Diplocientifica, Chile) and Alejandra Fabiola Flores-Zamora (Universidad de Guadalajara, Mexico)

Description:

Various challenges prevent many emerging economies, including those within Latin America, from exploring the full potential of science, technology, and innovation. One major issue is the global need for a comprehensive understanding of science diplomacy and its role in bridging gaps in these crucial areas. Existing research often overlooks these regions' specific contexts and challenges, leading to a knowledge chasm. **Developments and Approaches in Science Diplomacy: Latin America and the Caribbean** addresses this lack of knowledge head-on, offering a detailed exploration of science diplomacy in Latin America and the Caribbean, and its implications for development.

By focusing on real-world cases and practical insights, this book provides a roadmap for policymakers, diplomats, and researchers to harness the power of science diplomacy for sustainable development. Whether you're a researcher looking to deepen your understanding of science diplomacy or a policymaker seeking actionable strategies, this book offers a valuable resource. It highlights the importance of international engagement and collaboration in achieving development objectives, particularly in the context of the scientific diaspora and emerging economies. Through this lens, the book offers innovative solutions and strategies applied in Latin America and other regions facing similar challenges.
