

# Multidisciplinary Approach to Modern Digital Steganography

Part of the Advances in Information Security and Privacy Book Series

Sabyasachi Pramanik (Haldia Institute of Technology, India), Mangesh Manikrao Ghonge (Sandip Institute of Technology and Research Center, India), Renjith V Ravi (MEA Engineering College, India) and Korhan Cengiz (Trakya University, Turkey)

## Description:

Times of crisis are unexpected and they bring diverse challenges and opportunities for companies, financial markets, and the economy. One on hand, more risk and uncertainties appear, yet on the other hand, it is an opportunity to reorganize and reinvent the company. It is important for businesses to understand ways to deal with uncertainty and risk in times of economic downturn and what financial strategies and tools can be used to eliminate or reduce the potential negative effects. These effects can reach the company's financial performance, capital structure, as well as cause financial debt and the availability of cash-flow to companies. However, different financial instruments can sustain the business and deal with the difficulties of payment when sales reduce and uncertainty increases; thus, research is essential in this critical area. When economic downturn affects the financial markets, the role of banks, country dynamics, the economy, and many other facets of the business world, financial management becomes the key for business recovery.

**Multidisciplinary Approach to Modern Digital Steganography** shares relevant knowledge on challenges and opportunities caused by crises, such as the pandemic, and the effects on economic and financial arenas. The chapters cover topics such as business models to understand how companies react to pandemic and crises situations, as well as how they change their management and way of conducting business. Other important topics include sustainable development, international financial markets, capital structure changes, uncertainty and risk, and governance and leadership. This book is ideal for shareholders, directors and managers, economists, researchers, academics, practitioners, stakeholders, researchers, academicians, and students interested in knowledge on topics about challenges in the way that companies, financial markets, financial institutions, and governments respond to risk and uncertainty.
