Released: December 2013

## Broadband Wireless Access Networks for 4G: Theory, Application, and Experimentation

Part of the Advances in Wireless Technologies and Telecommunication Book Series

Raul Aquino Santos (University of Colima, Mexico),  
Victor Rangel Licea (National Autonomous University of Mexico, Mexico),  
and Arthur Edwards-Block (University of Colima, Mexico)

With the increased functionality demand for mobile speed and access in our everyday lives, broadband wireless networks have emerged as the solution in providing high data rate communications systems to meet these growing needs.

Broadband Wireless Access Networks for 4G: Theory, Application, and Experimentation presents the latest trends and research on mobile ad hoc networks, vehicular ad hoc networks, and routing algorithms which occur within various mobile networks. This publication smartly combines knowledge and experience from enthusiastic scholars and expert researchers in the area of wideband and broadband wireless networks. Students, professors, researchers, and other professionals in the field will benefit from this book's practical applications and relevant studies.

### Topics Covered:

- Applications
- Digital Communications
- Wireless Sensor Networks
- Wireless Robotic Systems
- Multimedia Technologies
- Broadband Networks
- Routing Algorithms

ISBN: 9781466648883; © 2014; 289 pp.

Print: US \$235.00 | Perpetual: US \$355.00 | Print + Perpetual: US \$470.00

### Pre-pub Discount:\*

Print: US \$225.00 | Perpetual: US \$335.00

\* Pre-pub price is good through one month after publication date.

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

**Raúl Aquino Santos** graduated from the University of Colima with a BE in Electrical Engineering, received his MS degree in Telecommunications from the Centre for Scientific Research and Higher Education in Ensenada, Mexico in 1990. He holds a PhD from the Department of Electrical and Electronic Engineering of the University of Sheffield, England. Since 2005, he has been with the College of Telematics, at the University of Colima, where he is currently a Research-Professor in telecommunications networks. His current research interests include wireless and sensor networks.
