

# Handbook of Research on Mobile Technology, Constructivism, and Meaningful Learning

Part of the Advances in Educational Technologies and Instructional Design Book Series

Jared Keengwe (University of North Dakota, USA)

## Description:

Advancements in technology in modern societies have resulted in an abundance of new educational tools and aids. Analyzing the effects of different mobile educational applications can provide insight into how technology can promote or discourage purposeful learning among students and educators alike.

The **Handbook of Research on Mobile Technology, Constructivism, and Meaningful Learning** is a crucial scholarly resource that examines the use of newly-developed technology on classroom education. Featuring pertinent topics that include collaborative learning, social media integration, virtual reality, and critical thinking dispositions, this publication is ideal for educators, academicians, students, and researchers that are interested in expanding their knowledge on recent trends and technologies that are enhancing the educational field.
