

Internet of Things and Advanced Application in Healthcare

Part of the Advances in Medical Technologies and Clinical Practice Book Series

Catarina I. Reis (Polytechnic Institute of Leiria, Portugal) and Marisa da Silva Maximiano (Polytechnic Institute of Leiria, Portugal)

Description:

The ubiquitous nature of the Internet of Things allows for enhanced connectivity between people in modern society. When applied to various industries, these current networking capabilities create opportunities for new applications.

Internet of Things and Advanced Application in Healthcare is a critical reference source for emerging research on the implementation of the latest networking and technological trends within the healthcare industry. Features in-depth coverage across the broad scope of the Internet of Things in specialized settings, such as context-aware computing, reliability, and healthcare support systems.

Readers:

This publication is an ideal resource for professionals, researchers, upper-level students, practitioners, and technology developers seeking innovative material on the Internet of Things and its distinct applications.

ISBN: 9781522518204

Release Date: February, 2017

Copyright: 2017

Pages: 311

Topics Covered:

- Assistive Technologies
- Context-Aware Computing Systems
- Health Risk Management
- Healthcare Support Systems
- Reliability Concerns
- Smart Healthcare
- Wearable Sensors

Hardcover +
Free E-Book:

\$210.00

E-Book Only:

\$210.00

Preface

Chapter 1

Background on Context-Aware Computing Systems
Amina Hameurlaine, MISC laboratory - Constantine 2 University, Algeria
Samiha Brahimi, MISC laboratory - Constantine 2 University, Algeria

Chapter 2

The Internet of Things and Assistive Technologies for People with Disabilities: Applications, Trends, and Issues
Hwa Lee, Bradley University, United States of America

Chapter 3

IoT for Ambient Assisted Living - Care4Me – A Healthcare Support System
Fulvio Corno, Politecnico di Torino, Italia
Luigi De Russis, Politecnico di Torino, Italia
Alberto Monge Roffarello, Politecnico di Torino, Italia

Chapter 4

Hybrid Integration Technology for Wearable Sensor Systems
Li-Rong Zheng, Royal Institute of Technology, Sweden
Li Xie, Thin Film Electronics ASA, Sweden
Geng Yang, Zhejiang University, China

Chapter 5

Citizen Science, Air Quality, and the Internet of Things
Ilze Black, Queen Mary University of London, Great Britain
Graham White, Electronic Engineering and Computer Science, Queen Mary University of London, Great Britain

Chapter 6

Preventing Health Risks from Air Quality using a CEP-based SOA 2.0

Chapter 7

The Role of Time in Health IoT
Lambert Spaanenburg, Comoray AB, Sweden

Chapter 8

Reliability of IoT-aware BPMN Healthcare Processes
Ana Respício, Universidade de Lisboa, Portugal
Dulce Domingos, Universidade de Lisboa, Portugal
Ricardo Martinho, Polytechnic Institute of Leiria, Portugal

Chapter 9

Thing Theory: Connecting Humans to Smart Healthcare
Sally A. Applin, Centre for Social Anthropology and Computing - University of Kent - Canterbury, United Kingdom
Michael D. Fischer, Centre for Social Anthropology and Computing - University of Kent - Canterbury, United Kingdom

Chapter 10

Social Internet of Things in Healthcare: From Things to Social Things in Internet of Things
Cristina Turcu, University of Suceava, România
Cornel Turcu, University of Suceava, România
