

Handbook of Research on Natural Computing for Optimization Problems (2 Vols.)

Part of the Advances in Computational Intelligence and Robotics (ACIR) Book Series

Jyotsna Kumar Mandal (University of Kalyani, India), Somnath Mukhopadhyay (Calcutta Business School, India) and Tandra Pal (National Institute of Technology Durgapur, India)

Description:

Nature-inspired computation is an interdisciplinary topic area that connects the natural sciences to computer science. Since natural computing is utilized in a variety of disciplines, it is imperative to research its capabilities in solving optimization issues.

The **Handbook of Research on Natural Computing for Optimization Problems** discusses nascent optimization procedures in nature-inspired computation and the innovative tools and techniques being utilized in the field.

Readers:

Highlighting empirical research and best practices concerning various optimization issues, this publication is a comprehensive reference for researchers, academicians, students, scientists, and technology developers interested in a multidisciplinary perspective on natural computational systems.

ISBN: 9781522500582

Release Date: May, 2016

Copyright: 2016

Pages: 972

Topics Covered:

- Artificial Immune Systems
- Deep Learning
- Evolutionary Computing
- Genetic Algorithms
- Neural Networks
- Quantum Cryptography
- Swarm Intelligence
