

# Innovations in Measuring and Evaluating Scientific Information

Part of the Advances in Standardization Research Book Series

J. John Jeyasekar (Tamil Nadu State Forensic Sciences Department, India) and P. Saravanan (Lekshmpuram College of Arts and Science, India)

## Description:

Across a variety of disciplines, data and statistics form the backbone of knowledge. To ensure the reliability and validity of data appropriate measures must be taken in conducting studies and reporting findings.

## Innovations in Measuring and Evaluating Scientific Information

provides emerging research on the theoretical base of scientific research and information literacy. While highlighting topics, such as bibliographical databases, forensic research, and trend analysis, this book explores visualization tools, software, and techniques for science mapping and scientific literature. This book is an important resource for scientific researchers, policy makers, research funding agencies, and students.

**ISBN:** 9781522534570

**Release Date:** March, 2018

**Copyright:** 2018

**Pages:** 315

## Topics Covered:

- Bibliographical Databases
- Collaborative Research
- Educational Resources
- Forensic Research
- Multi-Dimensional Scaling
- Science Mapping
- Scientific Research
- Trend Analysis
- Visualization Software

**Hardcover:** \$195.00

**E-Book:** \$195.00

**Hardcover + E-Book:** \$235.00
