

Regulatory Aspects of Artificial Intelligence on Blockchain

Part of the Advances in Computational Intelligence and Robotics Book Series

Pardis Moslemzadeh Tehrani (University of Malaya, Malaysia)

Description:

The convergence of Artificial Intelligence (AI) in blockchain creates one of the world's most reliable technology-enabled decision-making systems that is virtually tamper-proof and provides solid insights and decisions. The integration of AI and Blockchain affects many aspects from food supply chain logistics and healthcare record sharing to media royalties and financial security. It is imperative that regulatory standards are emphasized in order to support positive outcomes from the integration of AI in blockchain technology.

Regulatory Aspects of Artificial Intelligence on Blockchain provides relevant legal and security frameworks and the latest empirical research findings in blockchain and AI. Through the latest research and standards, the book identifies and offers solutions for overcoming legal consequences that pertain to the application of AI into the blockchain system, especially concerning the usage of smart contracts. The chapters, while investigating the legal and security issues associated with these applications, also include topics such as smart contracts, network vulnerability, cryptocurrency, machine learning, and more. This book is essential for technologists, security analysts, legal specialists, privacy and data security practitioners, IT consultants, standardization professionals, researchers, academicians, and students interested in blockchain and AI from a legal and security viewpoint.

ISBN: 9781799879275

Pages: 315

Copyright: 2021

Release Date: June, 2021

Hardcover: \$245.00

Softcover: \$185.00

E-Book: \$245.00

Hardcover + E-Book: \$295.00

Topics Covered:

Artificial Intelligence
Bitcoin
Blockchain
Blockchain Limitations
Cryptocurrency
Global Banking System

Legal Issues
Machine Learning
Network Vulnerability
Regulations
Security and Privacy
Smart Contract

Subject: Computer Science and Information Technology

Classification: Edited Reference

Readership Level: Advanced-Academic Level (Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
