Description:

Cannabis sativa has a long history; however, it has not been fully exploited for its beneficial uses. This plant can solve many present challenges, including challenges found in the pharmaceutical and cosmetic industries. Bioprospecting of this very important plant can generate economic upliftment of weaker sections of society and states if properly used under rules and regulations.

***Cannabis sativa* Cultivation, Production, and Applications in Pharmaceuticals and Cosmetics** discusses in detail the current research conducted in the area of *Cannabis sativa* in order to make it more useful and sustainable for the future. It further focuses on the exploration of *Cannabis sativa* phytoconstituents in various fields, especially in the pharmaceutical and cosmetic industries. Covering topics such as bioactive properties, molecular modeling, and soil pollutants, this premier reference source is an excellent resource for pharmacologists, pharmacists, health professionals, food scientists, agricultural scientists, botanists, chemists, students and educators of higher education, librarians, researchers, and academicians.
