

Cases on Managing Dairy Production Chains

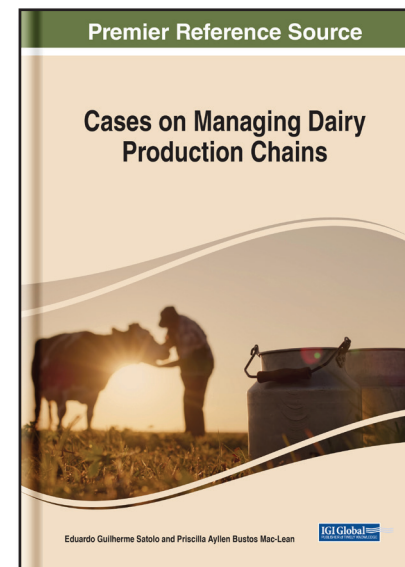

Part of the Advances in Logistics, Operations, and Management Science Book Series

Eduardo Guilherme Satolo (São Paulo State University, Brazil)
and Priscilla Ayllen Bustos Mac-Lean (São Paulo State University (UNESP), Brazil)

Description:

In order to maintain inclusive classrooms within both K-12 and higher education, it is essential that pre-service teachers and current educators are aware of the strategies and techniques involved in deaf education. Educators must be knowledgeable of practical situations that occur in deaf education classrooms and mainstream environments while using different strategies with students across the curriculum and modifying those to meet individual learners' needs.

Cases on Managing Dairy Production Chains supports instruction in a variety of deaf education courses providing sample cases and examples for students to work through and discuss. The case studies encourage critical thinking and thoughtful reflection related to a variety of deaf education environments and situations. Covering topics such as dual-modality collaborations, machine learning techniques, and reading instruction, this case book is an essential resource for educators and administrators of both K-12 and higher education, librarians, pre-service teachers, teacher educators, researchers, and academicians.
