

# Natural Language Processing: Concepts, Methodologies, Tools, and Applications (3 Vols.)

Information Resources Management Association (USA)

## Description:

As technology continues to become more sophisticated, a computer's ability to understand, interpret, and manipulate natural language is also accelerating. Persistent research in the field of natural language processing enables an understanding of the world around us, in addition to opportunities for manmade computing to mirror natural language processes that have existed for centuries.

**Natural Language Processing: Concepts, Methodologies, Tools, and Applications (3 Vols.)** is a vital reference source on the latest concepts, processes, and techniques for communication between computers and humans. Highlighting a range of topics such as machine learning, computational linguistics, and semantic analysis, this multi-volume book is ideally designed for computer engineers, computer and software developers, IT professionals, academicians, researchers, and upper-level students seeking current research on the latest trends in the field of natural language processing.

**ISBN:** 9781799809517

**Release Date:** November, 2019

**Copyright:** 2020

**Pages:** 1,700

## Topics Covered:

- Artificial Intelligence
- Computational Linguistics
- Content Analysis
- Human-Computer Interaction
- Language Engineering
- Language Generation
- Machine Learning
- Semantic Analysis
- Speech Recognition
- Text Mining

**Hardcover:** \$2,450.00

**E-Book:** \$2,450.00

**Hardcover + E-Book:** \$2,965.00
