

Tools and Technologies for the Development of Cyber-Physical Systems

Part of the Advances in Computer and Electrical Engineering Book Series

Sergey Balandin (FRUCT Oy, Finland) and Ekaterina Balandina (Tampere University, Finland)

Description:

With the continual development of professional industries in today's modernized world, certain technologies have become increasingly applicable. Cyber-physical systems, specifically, are a mechanism that has seen rapid implementation across numerous fields. This is a technology that is constantly evolving, so specialists need a handbook of research that keeps pace with the advancements and methodologies of these devices.

Tools and Technologies for the Development of Cyber-Physical Systems is an essential reference source that discusses recent advancements of cyber-physical systems and its application within the health, information, and computer science industries. Featuring research on topics such as autonomous agents, power supply methods, and software assessment, this book is ideally designed for data scientists, technology developers, medical practitioners, computer engineers, researchers, academicians, and students seeking coverage on the development and various applications of cyber-physical systems.

ISBN: 9781799819745

Release Date: December, 2019

Copyright: 2020

Pages: 300

Topics Covered:

- Assistive Technology
- Autonomous Agents
- Data Processing
- E-Tourism
- Embedded Network Design
- Human-Computer Interaction
- Internet of Things
- Model-Based Techniques
- Power Supply Methods
- Software Assessment

Hardcover: \$235.00

E-Book: \$235.00

Hardcover + E-Book: \$280.00
