## Description:

As digital technologies become central to teaching, learning, and research, international higher education faces challenges related to unequal access and participation. The digital divide shapes who can benefit from global academic opportunities. These disparities are visible between institutions and students in high- and low-resource contexts, affecting academic success, cross-border collaboration, and educational equity. Addressing digital divides in international higher education may reveal new challenges in social justice, inclusion, and the future sustainability of global knowledge exchange.
