Remote Sensing Techniques and GIS Applications in Earth and Environmental Studies

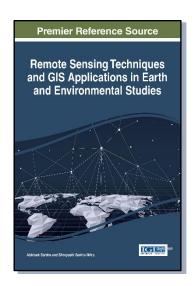

Part of the Advances in Geospatial Technologies Book Series

Abhisek Santra (Haldia Institute of Technology, India) and Shreyashi Santra Mitra (Haldia Institute of Technology, India)

Description:

Emerging technologies have enhanced the various uses of geographic information systems. This allows for more effective analysis of available data to optimize resources and promote sustainability.

Remote Sensing Techniques and GIS Applications in Earth and Environmental Studies is a critical reference source for the latest research on innovative methods for analyzing geographic data and utilizing sensor technologies for environmental monitoring. Features extensive coverage across a range of relevant perspectives and topics, such as land use, geospatial analysis, image interpretation, and site-suitability analysis.

Readers:

This book is ideally designed for engineers, professionals, practitioners, upper-level students, and academics actively involved in the various areas of environmental sciences.

ISBN: 9781522518143 **Release Date:** February, 2017 **Copyright:** 2017 **Pages:** 275

Topics Covered:

- Debris Flow Modelling
- Geochemical Studies
- Geospatial Analysis
- Image Interpretation
- Land Surface Temperature Estimation
- Land Use
- Natural Disaster Damage Assessment
- Risk Assessment
- Site-Suitability Analysis

Table of Contents

Foreword

Preface

Acknowledgment

Section 1: Techniques of Remote Sensing and GIS for Environmental Applications

Chapter 1

Identification of Geospatial Objects Using Spectral Pattern Subhabrata Barman, Haldia Institute of Technology, India

Chapter 2

Land Surface Temperature Estimation and Urban Heat Island Detection: A Remote Sensing Perspective Abhisek Santra, Haldia Institute of Technology, India

Chapter 3

A Review of outline on spectroscopic vis-a-vis geochemical study of Earth analogues for Mars Shovanlal Chattoraj, Indian Institute of Remote Sensing, India

Chapter 4

Improving the Efficiency of Image Interpretation Using Ground Truth Terrestrial Photographs Gennady Gienko, University of Alaska, United States & Michael Govorov, Vancouver Island University, CA

Chapter 5

Development of Web GIS Based Framework for Public Health Management System Using ERDAS Apollo 2010 Shipra Verma, Motilal Nehru National Information Technology, India

Section II: Applications of Remote Sensing and GIS for Environmental Monitoring

Chapter 6

Debris Flow Modelling and Risk Assessment of Selected Landslides from Uttarakhand- Case Studies using Earth Observation Data

Shovanlal Chattoraj, Indian Institute of Remote Sensing, India

Chapter 7

Space-Time Integrated Landslide Hazard Zonation near Tehri Dam in Uttarakhand, India: Integrated Landslide Hazard Zonation Ms. Pooja Rana, Sphere India, India & Jeganathan Chockalingam, Birla Institute of Technology, India & Arvind Chandra Pandey, Central University of Jharkhand, India

Chapter 8

Land Use - Terrain Correlations in the Piedmont Tract of Eastern India: A Case Study of the Dulung River Basin Ashis Sarkar, Chandernagore Government College, India & Priyank Pravin Patel, Presidency University, India

Chapter 9

Remote Sensing Techniques and Its Application in Arid Zones of India

Lokesh Kumar Jain, College of Agriculture, India

Chapter 10

Applications of Active Remote Sensing Technologies for Natural Disaster Damage Assessments Muhammad Tauhidur Rahman, King Fahd University of Petroleum and Minerals, Saudi Arabia

Chapter 11

Site-Suitability Analysis for the Identification of Potential Sites to Construct Rain Water Harvesting Systems
Shreyashi Santra Mitra, Haldia Institute of Technology India

Chapter 12

Role of Remote Sensing in Potential Fishing Zone Forecast Abhisek Santra, Haldia Institute of Technology, India & Debashis Mitra, Indian Institute of Remote Sensing, India

Chapter 13

Wildlife Habitat Evaluation

Mr. Peeyush Gupta, Intergraph SG & I India Pvt.Ltd., India & Swati Goyal, Guru Jambheshwar University of Science & Technology, India

Chapter 14

Measuring Dynamics of Ecological Footprint as an Index of Environmental Sustainability at the Regional Level Using Geospatial Information Technology: Measuring ecological footprint using GIS

Laxmikant Sharma, Central University of Rajasthan, India & Suman Sinha, Birla Institute of Technology, India

About the Contributors

Dr. Abhisek Santra is an Associate Professor of Remote Sensing in the Department of Civil Engineering, Haldia Institute of Technology. He is the founder coordinator of Geoinformatics Cell in the same institute. He has more than 10 years of teaching and research experience in the field of Remote Sensing and GIS. He has published more than 15 research articles in reputed peer reviewed journals and proceedings of national and international repute. He has also published one book and one book chapter in his field of expertise. Presently, Dr. Santra is in the editorial board member of three international journals and an active evaluator of Dept. of Science & Technology, Govt. of India funded research projects. His research areas of interest are environmental modeling, calibration and validation of earth observation data, thermal remote sensing and urban utility mapping. He is currently engaged in several government funded projects.
