

Transformative Approaches to Patient Literacy and Healthcare Innovation

Part of the Advances in Healthcare Information Systems and Administration Book Series

Manuel B. Garcia (FEU Institute of Technology, Philippines) and Rui Pedro Pereira de Almeida (University of Algarve, Portugal)

Description:

The disconnect between technology and traditional practices poses a significant challenge. Many healthcare professionals and individuals struggle to navigate the influx of emerging technologies, hindering the full realization of their potential in revolutionizing health literacy and medical practice. The lack of cohesive understanding and integration of technologies like mobile applications, wearable devices, artificial intelligence, and telemedicine impedes the seamless delivery of healthcare services and obstructs individuals from actively managing their health.

Transformative Approaches to Patient Literacy and Healthcare Innovation offers a comprehensive solution to bridge the gap between healthcare and technology. Delving into the dynamic fusion of these domains, it unravels the transformative power of technology applications, showcasing how they enhance health literacy and empower individuals to make informed decisions about their well-being. By providing insights into the integration of mobile health apps, electronic health records, extended reality, artificial intelligence, and more, the book equips readers with the knowledge needed to navigate the evolving healthcare landscape with confidence.

For academic scholars seeking a roadmap to understand and harness the potential of technology in healthcare, this book is an indispensable resource. Embrace the present and future of healthcare excellence by joining this exploration of innovation. Overcome the challenges, democratize access to knowledge, and usher in a new era where technology becomes the catalyst for improved health outcomes and patient-centered care.

ISBN: 9798369336618

Pages: 400

Copyright: 2024

Release Date: May, 2024

Hardcover: \$495.00

E-Book: \$495.00

**Hardcover +
E-Book:** \$595.00

Topics Covered:

- Artificial Intelligence
- Big Data Analytics
- ChatGPT
- Digital Health
- Extended Reality
- Gamification
- Health Education
- Health Informatics
- Health Literacy
- Instructional Technology
- Machine Learning
- Multimedia Approaches
- Social Media
- Technology Integration
- Telemedicine

Subject: Medicine & Healthcare

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
