

Research Anthology on Personal Finance and Improving Financial Literacy

IRMA (Information Resources Management Association, USA)

Description:

Along with the introduction of technology in nearly every facet of human life comes the question of the ethical side of using technology to improve the human condition, whether that be physically or mentally. The capabilities of human enhancement technologies have created a dual-sided approach to discussing human enhancement: the critical approach of attempting to reach human perfection and the ethics within that idea and the endless capabilities of technology that have greatly impacted the medical field. It is essential to discuss both aspects within these emerging technologies, whether as separate entities or as cohesive units. Ranging from disease detection and treatment to implants and prosthetics to robotics and genetic engineering, human enhancement technologies are widespread and multi-purposed. By going beyond the capabilities of human hands, these technologies have propelled modern medicine and healthcare to new levels that have allowed humans to face new treatments or assistive technologies not seen before.

Research Anthology on Personal Finance and Improving Financial Literacy covers the primary technologies and tools being used in medicine and healthcare along with discussions on the ethics of enhancing the human body. Topics covered include prosthetics and implants, robotics, human disorders/diseases and treatments and smart technologies, along with law and theory. This publication serves as a valuable reference work for doctors, medical professionals, researchers, students, professionals, and practitioners involved in fields that include ethics, medicine, computer science, robotics, genetics, assistive technologies, nanotechnology, biomedical engineering, and biotechnology.

ISBN: 9781799880493

Pages: 525

Copyright: 2021

Release Date: December, 2020

Hardcover: \$395.00

E-Book: \$395.00

**Hardcover +
E-Book:** \$475.00

Topics Covered:

3D Bio Printing
Artificial Intelligence
Biomechanics
Biomedical Technology
Disease Treatment

Ethics and Law
Exoskeletons
Genetics
Healthcare
Human Enhancement

Implants
Nanocarriers
Nanotechnology
Prosthetics
Robotics

Subject: Medical, Healthcare, and Life Sciences

Classification: Critical Exploration

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
