

International Journal of Systems and Service-Oriented Engineering (IJSSOE)

ISSN: 1947-3052; EISSN: 1947-3060
Established 2010; Published Quarterly

Editor(s)-in-Chief: Dickson K.W. Chiu (The University of Hong Kong, Hong Kong)

The International Journal of Systems and Service-Oriented Engineering (IJSSOE) brings together researchers from various fields, enriches their knowledge in related disciplines, and stimulates advancements in innovative findings and practices. Targeting theoreticians, educators, developers, researchers, practitioners, and professionals, this journal covers the challenges of system theories, model driven software engineering, and ontologies for software engineering into a systematic method for engineering service oriented systems.

Individual Price:

Print: US \$295
E-Journal: US \$295
Print + E-Journal: US \$360

Institution Price:

Print: US \$840
Online Access: US \$840
Print + Online Access: US \$1,015

Prices are subject to change without notification.

Indexed in:

ET Inspec

Topics Covered:

- Agent based technologies
- Cloud computing
- Communications as a service
- Communications, control, and integration among systems, human, organizations, and virtual communities
- Computational intelligence and soft computing
- Content, multimedia, and metadata management
- Data mining and web mining
- Decision support and strategic information systems
- Design management and engineering management
- Design science
- Electronic education and training
- Emerging system architectures, computing paradigm, and applications
- Emerging technologies
- Engineering processes and methodologies
- Exception handling, uncertainty, and risk management
- Game theory models and analysis
- Genetic algorithms and evolutionary computing
- Grid, autonomous, and peer-to-peer systems
- Infrastructure systems and services
- Integration of research and practice
- Intelligence computing for systems and services
- Intelligent in service management and operations
- Knowledge acquisition
- Knowledge discovery
- Knowledge engineering for systems and services
- Knowledge integration and engineering
- Knowledge representation and architecture
- Location and pervasive intelligence
- Logics and knowledge models
- Machine learning and cybernetics
- Meta-services
- Mobile, ubiquitous, and pervasive systems and services
- Modeling and simulation
- Negotiations, auctions, and electronic marketplaces
- Ontology and semantic web services
- Planning and optimization
- Reliability and quality engineering
- Requirement elicitation and analysis
- Self-organizing systems, complex systems, and system of systems
- Service adoption and diffusion
- Service marketing and relationship management
- Service matchmaking, recommendation, personalization, operation, and monitoring
- Service personnel and workforce management
- Services and systems in new application domains (e.g. aviation services)
- Social and legal issues of emerging technologies
- Software as a service (SaaS) and utility computing
- System and service innovations and standardization
- Systems engineering and services engineering
- Systems management and service management
- Technology assessment, adoption, and diffusion
- Testing, performance, and evaluation
- Trust, reputation, security, forensic, and privacy
- Virtualization, virtual systems, and virtual communities
- Web X.0

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at www.igi-global.com/publish/resources prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:
Dickson K.W. Chiu, IJSSOE@igi-global.com
