Comparative Analysis of Digital Consciousness and Human Consciousness: Bridging the Divide in AI Discourse

Part of the Advances in Computational Intelligence and Robotics Book Series
Remya Lathabhavan (IIM BODH GAYA, India) and Nidhi Mishra (IIM BDDH GAYA, India)

Description:

In today's digital age, the rapid advancement of AI and digital technologies has led to the emergence of digital consciousness, blurring the lines between human and machine thinking. At the same time, these technologies offer unprecedented convenience and efficiency but pose significant challenges. Individuals are increasingly facing issues such as stress, anxiety, and technology addiction, impacting their overall well-being and decision-making processes. The dichotomy between digital consciousness and human consciousness raises critical questions about how we can navigate these challenges in a rapidly evolving technological landscape.

To address these pressing concerns, **Comparative Analysis of Digital Consciousness and Human Consciousness: Bridging the Divide in AI Discourse** offers a comprehensive exploration of the impacts of digital consciousness on human well-being and decision-making. This book delves into the paradoxes and challenges posed by the coexistence of digital and human consciousness, providing insights from psychological perspectives, practitioner experiences, and academic research. By offering a nuanced understanding of these concepts, we aim to equip readers with the knowledge and tools needed to manage the implications of digital consciousness in their personal and professional lives.

This book is essential for researchers, academicians, practitioners, and individuals interested in understanding this complex interplay between machine and human consciousness. Through a detailed examination of various aspects, including social media addiction, employee anxiety, and well-being practices, we provide a roadmap for navigating the complexities of the digital age. By fostering a deeper understanding of these issues, the experts behind this research hope to inspire meaningful discussions and drive positive change in how we engage with technology daily.

ISBN: 9798369320150 | **Pages:** 310 | **Copyright:** 2024 | **Release Date:** May, 2024

Hardcover: $315.00 | **E-Book:** $315.00 | **Hardcover + E-Book:** $380.00

Topics Covered:

- Artificial Intelligence
- Differences in Reactions Between Gender Groups
- Differences in Reactions Between Generations
- Digital Consciousness
- Employee Anxiety
- Healthy Digital Environments for Work
- Human Consciousness
- Human-Computer Interaction
- Mental Health
- Professional Life
- Psychology
- Social Media Addiction
- Wellbeing Practices

Subject: Computer Science & Information Technology

Classification: Edited Reference

Readership Level: Advanced-Academic Level (Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
