Print: US \$215.00 | Perpetual: US \$325.00 | Print + Perpetual: US \$430.00

Part of the Advances in Human and Social Aspects of Technology Book Series

Steven John Thompson (Johns Hopkins University, USA)

With rapid advancements in human enhancement technologies, society struggles with many issues, such as definition, effects, participation, regulation, and control. Current and future initiatives in these technologies may not be in the participants' best interests; therefore, it is imperative for research on humanitarian considerations to be available to those affiliated with this field.

Global Issues and Ethical Considerations in Human Enhancement Technologies compiles prestigious research and provides a well-rounded composite of the field's role in emerging technologies. Addressing both present and future concerns, this publication serves as a valuable reference work for researchers, students, professionals, and practitioners involved in computer science and the humanities, as well as many engaged in a humanities approach to metasystems, new artificial life, and robotics.

Topics Covered:

- Emerging Technologies
- Human-Computer Interface
- Engineering Ethics
- · Digital Society

- · Freedom in Experimentation
- · Human Enhancement Technology
- Human Rights and Values

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.
