

Handbook of Research on Advancements in Manufacturing, Materials, and Mechanical Engineering

Part of the Advances in Mechatronics and Mechanical Engineering Book Series

Leonid Burstein (Independent Researcher, Israel)

Description:

Production, new materials development, and mechanics are the central subjects of modern industry and advanced science. With a very broad reach across several different disciplines, selecting the most forward-thinking research to review can be a hefty task, especially for study in niche applications that receive little coverage. For those subjects, collecting the research available is of utmost importance.

The **Handbook of Research on Advancements in Manufacturing, Materials, and Mechanical Engineering** is an essential reference source that examines emerging obstacles in these fields of engineering and the methods and tools used to find solutions. Featuring coverage of a broad range of topics including fabricating procedures, automated control, and material selection, this book is ideally designed for academics; tribology and materials researchers; mechanical, physics, and materials engineers; professionals in related industries; scientists; and students.

ISBN: 9781799849391

Pages: 300

Copyright: 2021

Release Date: September, 2020

Hardcover: \$295.00

Softcover: \$225.00

E-Book: \$295.00

Hardcover + E-Book: \$355.00

Topics Covered:

Additive Manufacturing
Alternative Fuels
Assembly Joining Technologies
Automated Control
Automotive Industry
Cable Design
Cylinder Vibration Analysis
Deformable Fractal Surface Dynamics

Fabricating Procedures
FEM analysis
Harmonic Excitation
Hybrid Modeling and Optimization
Hydropneumatic suspension
Industry 4.0
Material Selection

Subject: Science and Engineering

Classification: Handbook of Research

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
