

Handbook of Research on Emerging Trends and Technologies in Library and Information Science

Part of the Advances in Library and Information Science Book Series

Anna Kaushik (University of Kota, India), Ashok Kumar (Maharishi Markandeshwar (Deemed to be University), India) and Payel Biswas (Institute of Urban Transport, India)

Description:

With the perpetual advancements of technology, library and information science professionals are tasked with understanding these technologies and providing accurate and comprehensive information to other potential users. These professionals must develop best practices for understanding these technologies in order to best serve other users.

The **Handbook of Research on Emerging Trends and Technologies in Library and Information Science** is a critical research book that examines advancing technologies and new innovations and their influences on library and information sciences for improved best practices. Featuring an array of topics such as digital libraries, distance education, and information literacy, this publication is essential for librarians, knowledge managers, information retrieval specialists, library and information science professionals, information scientists, researchers, web librarians, academicians, educators, IT specialists, and managers.
