

# Handbook of Research on Military, Aeronautical, and Maritime Logistics and Operations

Part of the Advances in Logistics, Operations, and Management Science (ALOMS) Book Series

Alberto Ochoa-Zezzatti (Juarez City University, Mexico), Jóns Sánchez (Consejo Nacional De Ciencia Y Tecnología (CONACYT), Mexico), Miguel Gastón Cedillo-Campos (Transportation Systems and Logistics National Laboratory, Mexican Institute of Transportation, Mexico) and Margain de Lourdes (Polytechnic University of Aguascalientes, Mexico)

## Description:

Effective logistics management has played a vital role in delivering products and services, and driving research into finding ever improving theoretical and technological solutions. While often thought of in terms of the business world, logistics and operations management strategies can also be effectively applied within the military, aeronautical, and maritime sectors.

The **Handbook of Research on Military, Aeronautical, and Maritime Logistics and Operations** compiles interdisciplinary research on diverse issues related to logistics from an inclusive range of methodological perspectives. This publication focuses on original contributions in the form of theoretical, experimental research, and case studies on logistics strategies and operations management with an emphasis on military, aeronautical, and maritime environments.

## Readers:

Academics and professionals operating in business environments, government institutions, and military research will find this publication beneficial to their research and professional endeavors.

**ISBN:** 9781466697799

**Release Date:** February, 2016

**Copyright:** 2016

**Pages:** 587

## Topics Covered:

- Computer Simulation
- Game Theory
- Logistics Management
- Operations Management
- Optimization Algorithms
- Supply Chain Management
- Transportation Planning
