

Applications and Developments in Semantic Process Mining

Part of the Advances in Data Mining and Database Management Book Series

Kingsley Okoye (University of East London, UK)

Description:

As technology becomes increasingly intelligent, various factors within the field of data science are seeing significant transformation. Process analysis is one area that is undergoing substantial development due to the implementation of semantic reasoning and web technologies. The congruence of these two systems has created various applications and developments in data processing and analysis across several professional fields.

Applications and Developments in Semantic Process Mining is

an essential reference source that discusses the improvement of process mining algorithms through the implementation of semantic modeling and representation. Featuring research on topics such as domain ontologies, fuzzy modeling, and information extraction, the book takes into account the different stages of process mining and its application in real time and then expounds the classical process mining techniques to semantical preparation of the extracted models for further analysis and querying at a more abstract level. The book provides a wide-ranging idea of the application and development of semantic process mining that is expected to be beneficial and used by professionals, software and data engineers, software developers, IT experts, business owners and entrepreneurs, and process analysts.

ISBN: 9781799826682

Pages: 350

Copyright: 2020

Release Date: April, 2020

Hardcover: \$195.00

Softcover: \$150.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00

Topics Covered:

Annotation Techniques
Business Intelligence
Data Quality
Domain Ontologies
Fuzzy Modeling

Information Extraction
Mining Algorithms
Performance Measurement
Semantic Reasoning
Web Technologies

Subject: Computer Science and Information Technology

Classification: Authored Reference

Readership Level: Advanced-Academic Level (Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners

Order Information

Phone: 717-533-8845 x100
