Green Enterprises

Cloud Computing Technologies for Green Enterprises

Part of the Advances in Business Information Systems and Analytics Book Series

Kashif Munir (University of Hafr Al-Batin, Saudi Arabia)

Description:

Emerging developments in cloud computing have created novel opportunities and applications for businesses. These innovations not only have organizational benefits, but can be advantageous for green enterprises as well.

Cloud Computing Technologies for Green Enterprises is a pivotal reference source for the latest scholarly research on the advancements, benefits, and challenges of cloud computing for green

enterprise endeavors. Highlighting pertinent topics such as resource allocation, energy efficiency, and mobile computing, this book is a premier resource for academics, researchers, students, professionals, and managers interested in novel trends in cloud computing applications.
