

Impact of Women in Food and Agricultural Development

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Sanusi Mohammed Sadiq (Federal University Dutse, Nigeria, Nigeria)

Description:

In the field of global agricultural development, the unequal recognition and acknowledgment of women's indispensable role in shaping the sector has become a pressing concern. While women have long been the backbone of agricultural progress, their multifaceted contributions often remain overlooked, hindering the pursuit of sustainable and equitable solutions in an ever-evolving world. As we confront the pressing need for inclusivity and resilience in agriculture, it becomes important to examine and celebrate the transformative influence of women. **Impact of Women in Food and Agricultural Development** serves as an illuminating exploration, delving into the uncharted roles that women play, from tilling the soil to navigating complex supply chains, and championing sustainable practices. It is a compelling response to the urgent call for recognizing and addressing the challenges faced by women in this crucial sector.

Impact of Women in Food and Agricultural Development endeavors to shed light on the challenges women face, the triumphs they achieve, and the profound changes they instigate within the agricultural sector. Drawing on a rich tapestry of stories, data, and expert insights, this book seeks to provide a deep understanding of how women contribute to and are impacted by global agricultural development. As we navigate an era marked by climate uncertainties, technological advancements, and the urgent need for sustainable practices, understanding the dynamic role of women in agriculture is not just an academic pursuit but a crucial step towards building a more resilient and equitable future. Through the lens of this book, we embark on a journey that illuminates the untold stories of women who, against various odds, have become catalysts for change, shaping the present and future of food and agricultural development.

The primary objective of this book is to address this issue by providing a comprehensive exploration of the pivotal roles women play in shaping and influencing the global landscape of agriculture. By addressing a broad spectrum of readers, including Researchers and Academics, Policymakers and Advocacy Groups, Practitioners and Professionals, NGOs and Development Organizations, Educational Institutions, the General Public, and International Organizations, the book aspires to create a collective understanding of the significance of women in food and agricultural development. Through the recommended topics spanning Historical Perspectives to Sustainable Agriculture, Supply Chain and Market Access to Resilience and Climate Change, **Impact of Women in Food and Agricultural Development** offers a holistic view of the impact of women in food and agricultural development, inspiring action towards a more equitable and sustainable future.

ISBN: 9798369330371

Pages: 300

Copyright: 2025

Release Date: July, 2024

Hardcover: \$255.00

E-Book: \$255.00

Hardcover +
E-Book: \$305.00

Topics Covered:

- Challenges and Barriers
- Community Development
- Economic Contributions
- Education and Training
- Ergonomics of Women for Sustainable Agriculture
- Global and Local Perspectives
- Historical Perspectives
- Innovations and Best Practices
- Intersectionality
- Policy and Advocacy
- Resilience and Climate Change
- Supply Chain and Market Access
- Sustainable Agriculture
- Technological Advancements
- Women's Role in Farm Management

Subject: Environment & Agricultural

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
