3-D Surface Geometry and Reconstruction: Developing Concepts and Applications

Umesh Chandra Pati (National Institute of Technology, Rourkela, India)

The methods used to digitize and reconstruct complex 3-D objects have evolved in recent years due to increasing attention from industry and research. 3-D models have applications in various domains, including reverse engineering, collaborative design, inspection, entertainment, virtual museums, medicine, geology and home shopping.

3-D Surface Geometry and Reconstruction: Developing Concepts and Applications provides developers and scholars with an extensive collection of research articles in the expanding field of 3-D reconstruction. This reference book investigates the concepts, methodologies, applications and recent developments in the field of 3-D reconstruction, making it a useful resource for students, researchers, academics, professionals and industry practitioners.

Topics Covered:

- 3-D Modeling and Rendering
- 3-D Object Shape Acquisition
- 3-D Reconstruction of Graph Objects
- 3-D Reconstruction of Underwater Natural Scenes
- 3-D Shape Measurement
- 3-D Surface Reconstruction
- Depth Estimation for HDR Images
- PDE-Based Image Processing
- Projective Geometry
- Reassembly of 3-D Fragments

ISBN: 9781466601130; © 2012; 405 pp.

Print: US \$195.00 | Perpetual: US \$295.00 | Print + Perpetual: US \$390.00

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Umesh C. Pati is an Associate Professor in the Department of Electronics and Communication Engineering at National Institute of Technology, Rourkela, India. He received a B.E. in Electrical Engineering from Regional Engineering College (now National Institute of Technology), Rourkela and M.Tech. and Ph.D. in Electrical Engineering from Indian Institute of Technology, Kharagpur, India. His current research interests are in the areas of image processing, computer vision, signal processing, and instrumentation. He has published one book and more than 40 research papers in referred journals and conference proceedings. He has served as referee in different international journals and conferences. He is a member of IEEE.

Section 1: Introductory Chapters

Chapter 1

Methods of 3D Object Shape Acquisition

Zemcik Pavel (Brno University of Technology, Czech Republic)
Spanel Michal (Brno University of Technology, Czech Republic)
Krsek Premysl (Brno University of Technology, Czech Republic)
Richter Miloslav (Brno University of Technology, Czech Republic)

Chapter 2

Projective Geometry for 3D Modeling of Objects

Elias Rimon (German University in Cairo, Egypt)

Chapter 3

PDE-Based Image Processing

Srivastava Rajeev (Institute of Technology, Banaras Hindu University (ITBHU), India)

Section 2: 3D Reconstruction

Chapter 4

Hybrid GPU Local Delaunay Triangulation through Points Consolidation

Buchart Carlos (CEIT, Spain & TECNUN (University of Navarra), Spain)
Amundarain Aiert (CEIT, Spain)
Borro Diego (CEIT, Spain & TECNUN (University of Navarra), Spain)

Chapter 5

3D Reconstruction of Underwater Natural Scenes and Objects Using Stereo Vision

Prabhakar C.J. (Kuvempu University, India)
Kumar P.U. Praveen (Kuvempu University, India)
Hiremath P.S. (Gulbarga University, India)

Chapter 6

3D Reconstruction of Graph Objects, Scenes, and Environments

Chikatla Suhana (Wallace State, USA)
Bitrus-Ojiambo Ukaiko (St. Paul's University, Kenya)

Chapter 7

Depth Estimation for HDR Images

Manikandan S. (Electronics and Radar Development Establishment, Defense Research and Development Organization, India)

Chapter 8

Monocular-Cues Based 3-D Reconstruction

Tumu Sudheer (State University of New York-Albany, USA)
Avasarala Viswanath (GE Global Research, USA)
Jonnalagadda Sai Tejaswi (Hetero Med Solutions, India)
Wadekar Prasad (Mahindra Satyam, USA)

Chapter 9

Image Based 3D Modeling and Rendering from Single View Perspective Images

Mohan S. (Dr.N.G.P Institute of Technology, India)
Murali S. (Maharaja Institute of Technology, India)

Section 3: Real-World Applications

Chapter 10

Surface Modelling Using Discrete Basis Functions for Real-Time Automatic Inspection

O'Leary Paul (Institute for Automation, University of Leoben, Austria)
Harker Matthew (Institute for Automation, University of Leoben, Austria)

Chapter 11

Application of Red, Green, and Blue Color Channels in 3D Shape Measurement

Zhang Zonghua (Hebei University of Technology, China)

Chapter 12

Widely-Separated Stereo Views Turn into 3D Objects

Elias Rimon (German University in Cairo, Egypt)

Chapter 13

Complementary Part Detection and Reassembly of 3D Fragments

Kaushik Vandana Dixit (Harcourt Butler Technological Institute, India)
Gupta Phalguni (Indian Institute of Technology Kanpur, India)

Chapter 14

3D Surface Reconstruction from Multiviews for Prosthetic Design

Mahmood Nasrul Humaimi Bin (Universiti Teknologi Malaysia, Malaysia)
