Grid and Cloud Computing: Concepts, Methodologies, Tools and Applications

Information Resources Management Association, USA

Distributed computing, through the power of grids or clouds, has allowed software and hardware developers to achieve high performance computing through cutting-edge technologies that are constantly changing.

Grid and Cloud Computing: Concepts, Methodologies, Tools and Applications presents a vital compendium of research detailing the latest case studies, architectures, frameworks, methodologies, and research on Grid and Cloud Computing. With over 100 chapters from authors from around the world, this four volume collection presents the most sophisticated research and developments from the field, relevant to researchers, academics, and practitioners alike. In order to stay abreast of the latest research, this book affords a vital look into grid and cloud middleware, hardware, and software research.

Topics Covered:

- Globus toolkit
- Open Science Grid
- CNGrid
- SaaS
- Agility
- Reliability
- Scalability
- Maintenance
- Performance
- Multi-tenancy

ISBN: 9781466608795; © 2012; 2134 pp.

Print: US \$2,050.00 | Perpetual: US \$3,075.00 | Print + Perpetual: US \$4,100.00

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Information Resources Management Association (IRMA) is a research-based professional organization dedicated to advancing the concepts and practices of information resources management in modern organizations. IRMA's primary purpose is to promote the understanding, development and practice of managing information resources as key enterprise assets among IRM/IT professionals. IRMA brings together researchers, practitioners, academicians, and policy makers in information technology management from over 50 countries.
