Princely Ifinedo (Cape Breton University, Canada),
& Iwara Arikpo (University of Calabar, Nigeria)

No aspect of business, public, or private lives in developed economies can be discussed today without acknowledging the role of information and communication technologies (ICT). A shortage of studies still exists, however, on how ICTs can help developing economies.

Leveraging Developing Economies with the Use of Information Technology: Trends and Tools moves toward filling the gap in research on ICT and developing nations, bringing these countries one step closer to advancement through technology. This essential publication will bring together ideas, views, and perspectives helpful to government officials, business professionals, and other individuals worldwide as they consider the use of ICT for socio-economic progress in the developing world.

Topics Covered:

- Community networking and information systems
- Digital divide and developing countries
- Distance education and e-learning
- E-business and e-commerce
- E-government
- E-tourism
- Global information systems
- IT research and theory
- Knowledge management
- Software engineering

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.
