Keng Siau (Missouri University of Science and Technology, USA)

New techniques and tools for database and database technologies are continuously being introduced. These technologies are the heart of many business information systems and can benefit from theories, models, and research results from other disciplines.

Innovations in Database Design, Web Applications, and Information Systems Management presents ideal research in the areas of database theory, systems design, ontologies, and many more. Including examples of the convergence of ideas from various disciplines aimed at improving and developing the theory of information technology and management of information resources, this book is useful for researchers and practitioners in the IT field.

Topics Covered:

- Database Management and Administration
- Database Models and Query Languages
- Database Security and Integrity
- Design Science
- Domain-Driven Development
- E-business and M-Commerce Models and Architectures
- Information and Knowledge Modeling
- Intelligent Agents and Agent-Based Applications
- Knowledge Engineering and Management
- Method Engineering and Metamodeling
- Object Oriented Methods and Methodologies
- Requirements Engineering

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Keng Siau is the Chair of the Department of Business and Information Technology at the Missouri University of Science and Technology. Prior to joining the Missouri University of Science and Technology in June 2012, he was the Edwin J. Faulkner Chair Professor and Full Professor of Management at the University of Nebraska-Lincoln. Professor Siau is the Editor-in-Chief for the *Journal of Database Management*, North America Regional Editor for the *Requirements Engineering* journal and Co-Editor-in-Chief for the *Advances in Database Research* series. He is the Vice President of Education for the Association for Information Systems and serves on the Board of Partnership for Advancing Computing Education (PACE). He received his PhD in Business Administration (major: Management Information Systems; minor: Psychology) from the University of British Columbia in 1996. His MSc and BSc (honors) degrees are in Computer and Information Sciences from the National University of Singapore.
