E-Procurement Management for Successful Electronic Government Systems

Patricia Ordóñez de Pablos (University of Oviedo, Spain),
Juan Manuel Cueva Lovelle (University of Oviedo, Spain),
José Emilio Labra Gayo (Universidad de Oviedo, Spain)
and Robert Tennyson (University of Minnesota, USA)

As governments search for the best ways to restyle their services, the E-Government field continues to attract interest from public administrators, politicians, academics, and citizens. As a result, new topics such as e-procurement have become core factors in public sector development by providing way to better serve citizens and businesses in our digital economy.

E-Procurement Management for Successful Electronic Government Systems enhances the understanding and collaboration in e-government and the role of information technologies in supporting the development of improved services for citizens. By analyzing recent developments in theory and practices as well as providing fresh ideas and research, this reference source aims to bridge the gap between academia, industry, and government.

Topics Covered:

- Architecture for Facilitating Strategies and Technologies
- Benchmarking and Assessment of e-Government Projects
- Blogs and Wikis and E-Government
- Case Studies and Best Practices
- Citizen-Centric E-Government
- Cloud Computing
- Collaborative E-Procurement
- Cyberterrorism
- Delivery Channels for E-Government
- Public Sector E-Procurement
- Semantic Web Services
- Service Sector E-Procurement
- Service-Oriented Architectures

ISBN: 9781466621190; © 2013; 325 pp.
