## Integrated Models for Information Communication Systems and Networks: Design and Development

Aderemi Aaron Anthony Atayero (Covenant University, Nigeria) and Oleg I. Sheluhin (Moscow Technical University of Communication & Informatics, Russia)

With current advancements in the modeling and simulation of systems and networks, researchers and developers are better able to determine the probable state of current systems and envision the state of future systems during the design stage. The uses and accuracies of these models are essential to every aspect of communication systems.

### **Integrated Models for Information Communication Systems and Networks: Design and Development**

explores essential information and current research findings on information communication systems and networks. This reference source aims to assist professionals in the desire to enhance their knowledge of modeling at systems level with the aid of modern software packages.

### Topics Covered:

- Artificial Intelligence
- Information Communication Systems
- Mobile Ad Hoc Wireless Networks
- Neural Network Control
- Power Systems
- Software Architecture
- Systems Modeling
- Vehicular Ad Hoc Wireless Networks

ISBN: 9781466622081 © 2013; 462 pp.

Print: US \$190.00 | Perpetual: US \$285.00 | Print + Perpetual: US \$380.00

### Pre-pub Discount:\*

Print: US \$180.00 | Perpetual: US \$270.00

\* Pre-pub price is good through one month after publication date.

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.
