# Computer Vision for Multimedia Applications: Methods and Solutions

PREMIER REFERENCE SOURCE

### Computer Vision for Multimedia Applications

Methods and Solutions

Jinjun Wang, Jian Cheng & Shuqiang Jiang

ISBN: 9781609600242; © 2011; 354 pp.

Print: US \$180.00 | Perpetual: US \$255.00 | Print + Perpetual: US \$360.00

Jinjun Wang (NEC Laboratories America, Inc., USA), Jian Cheng (Chinese Academy of Sciences, China) and Shuqiang Jiang (Chinese Academy of Sciences, China)

Although a number of methods for solving computer vision tasks exist, these methods are often task-specific and can seldom be generalized over a wide range of applications. In addition, many computer vision algorithms have not been thoroughly studied.

Computer Vision for Multimedia Applications: Methods and Solutions includes the latest developments in computer vision methods applicable to various problems in multimedia computing. This publication presents discussions on new ideas, as well as problems in computer vision and multimedia computing. It will serve as an important reference in multimedia and computer vision for academicians, researchers, and academic libraries.

#### **Topics Covered:**

- 3D modeling
- Broadcasting technologies
- Computer vision in human computer interaction
- Content-based multimedia retrieval
- Image synthesis
- · Motion analysis in multimedia

- Multimedia content adaption in wireless environment
- Multimedia visual content representation
- Object analysis in multimedia
- Video segmentation

**Market:** This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Jinjun Wang received a B.E. and M.E. degree from Huazhong University of Science and Technology, China, in 2000 and 2003. He received a Ph.D degree from Nanyang Technological University, Singapore, in 2006. From 2006 to 2009, Dr. Wang was with NEC Laboratories America, Inc. as a postdoctoral research scientist and in 2010, he joined Epson Research and Development, Inc. as a senior research scientist. His research interests include pattern classification, image/video enhancement and editing, content-based image/video annotation and retrieval, semantic event detection, etc. He has published over 30 journal and conference papers in those areas and has six US patents pending. Dr. Wang served as Technical Program Committee Member of major international multimedia conferences, including ACM MM'08, IEEE PCM'09, IEEE MMM'09/'10, IEEE 3D-TV'09/'10, etc. He also served as peer reviewer of many journals and conferences.

#### Section 1: Computer Vision for Human Computer Interaction Section 3: Computer Vision for Multimedia Content Analysis Chapter 1 Chapter 9 Intelligent Vision Systems for Landmark-Based Vehicle Navigation Event Detection in Sports Video Based on Generative-Discriminative Models Wu Wen (Carnegie Mellon University, USA) Fan Guoliang (Oklahoma State University, USA) Yang Jie (Carnegie Mellon University, USA) Ding Yi (Oklahoma State University, USA) Chen Xilin (Chinese Academy of Sciences, China) Content-Based Video Scene Clustering and Segmentation Spontaneous Facial Expression Analysis and Synthesis for Interactive Facial Animation Lu Hong (Fudan University, China) Zhang Yongmian (Rensselaer Polytechnic Institute, USA) Xue Xiangyang (Fudan University, China) Chen Jixu (Rensselaer Polytechnic Institute, USA) Tong Yan (GE Global Research, USA) Ji Qiang (Rensselaer Polytechnic Institute, USA) Chapter 11 Vision Based Hand Posture Recognition Wang Kongqiao (Nokia Research Center, China) Chapter 3 Fang Yikai (Nokia Research Center, China) A Modular Framework for Vision-Based Human Computer Interaction Chai Xiujuan (Chinese Academy of Sciences, China) Iannizzotto Giancarlo (University of Messina, Italy) La Rosa Francesco (University of Messina, Italy) Section 4: Multimedia Authentication Robust Human Face Tracking in Eigenspace for Perceptual Human-Robot Interaction Jiang Richard M. (Loughborough University, UK) Sadka Abdul H. (Brunel University, UK) Chapter 12 Detecting Image Forgeries using Geometric Cues Wu Lin (Tianjin University, China) Wang Yang (Tianjin University, China) 3D Face Modeling for Multi-Feature Extraction for Intelligent Systems Riaz Zahid (Technische Universität München, Germany) Chapter 13 Gedikli Suat (Technische Universität München, Germany) Salient Region Detection for Biometric Watermarking Beetz Michael (Technische Universität München, Germany) Ma Bin (Beihang University, China) Radig Bernd (Technische Universität München, Germany) Li Chun-lei (Beihang University, China & Zhongyuan Institute of Technology, China) Wang Yun-hong (Beihang University, China) Bai Xiao (Beihang University, China) Section 2: Computer Vision for Multimedia Content Summary and Retrieval Section 5: Biologically Inspired Multimedia Computing Video Summarization by Redundancy Removing and Content Ranking Chapter 14 Wang Tao (Intel Labs China, China) Gao Yue (Intel Labs China, China & Tsinghua University, China) Wang Patricia P. (Intel Labs China, China) Bio-Inspired Scheme for Classification of Visual Information Dong Le (University of Electronic Science and Technology of China, China) Hu Wei (Intel Labs China, China) Izquierdo Ebroul (University of London, UK) Li Jianguo (Intel Labs China, China) Ge Shuzhi Sam (University of Electronic Science and Technology of China, China) Du Yangzhou (Intel Labs China, China) Zhang Yimin (Intel Labs China, China) Ant-Inspired Visual Saliency Detection in Image Tian Jing (South China University of Technology, China) Multi-Sensored Vision for Autonomous Production of Personalized Video Summary Yu Weiyu (South China University of Technology, China) Chen Fan (Université catholique de Louvain, Belgium) Delannay Damien (Université catholique de Louvain, Belgium) De Vleeschouwer Christophe (Université catholique de Louvain, Belgium) Parisot Pascaline (Université catholique de Louvain, Belgium) Chapter 16 Modeling Visual Saliency in Images and Videos Hu Yiqun (Nanyang Technological University, Singapore) Gopalakrishnan Viswanath (Nanyang Technological University, Singapore) Rajan Deepu (Nanyang Technological University, Singapore) A Perceptual Approach for Image Representation and Retrieval: Abbadeni Noureddine (King Saud University, Saudi Arabia)
