Darek Haftor (Linnaeus University, Sweden) and Anita Mirijamdotter (Linnaeus University, Sweden)

There is a real need for an enlightening new volume to explore the recent developments and topical analyses of the psychological and social effects of ICT.

Information and Communication Technologies, Society and Human Beings: Theory and Framework addresses the extensive area of effects of ICT on human beings and the interaction between ICT, individuals, organizations, and society. This premier reference source features contributions from over 45 distinguished researchers from around the world, each presenting high quality research on social informatics, human computer interaction, organizational behavior, and macro-ergonomics. This unique publication is perfect for students, teachers, researchers, engineers, practitioners, managers, policy-makers, and media alike.

Topics Covered:

- Community Informatics
- · Ethics of Informatics
- · Humans and Society
- Human Computer Interaction
- Human-Machine Interaction
- ICT and Social Change

- ICT-enabled Organizational Design and Management
- Organizational Behavior
- Social Informatics
- · Technology and Society

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Darek Haftor is currently an associate professor at the Stockholm University School of Business, Stockholm, Sweden. He has studied the sciences and arts at various universities in Europe and North America, and received his doctorate in Industrial Organization at Chalmers University of Technology, Sweden. He has spent fifteen years in various managerial positions in the private industry sector, and has worked in Europe and the Middle East. Previously, he has held several academic positions in Sweden, including the Mid Sweden University, the Luleâ University of Technology, and at the Linnaeus University where he is currently affiliated as a senior researcher. Darek is now mainly occupied with research and teaching, and he is also the Director of Executive Education at the Stockholm University School of business. His research addresses two main frontiers: the structure and dynamics of information-based organizations and their operations, and the normative conditions inherent in the design, development and change of any human affairs.
