Technology for Facilitating Humanity and Combating Social Deviations: Interdisciplinary Perspectives

Miguel Vargas Martin (University of Ontario Institute of Technology, Canada), Miguel A. Garcia-Ruiz (University of Colima, Mexico) and Arthur Edwards (University of Colima, Mexico)

Technology has been used to perpetrate crimes against humans, animals, and the environment, which include racism, cyber-bullying, illegal pornography, torture, illegal trade of exotic species, irresponsible waste disposal, and other harmful aberrations of human behavior.

Technology for Facilitating Humanity and Combating Social Deviations: Interdisciplinary Perspectives provides a state-of-the-art compendium of research and development on socio-technical approaches to support the prevention, mitigation, and elimination of social deviations with the help of computer science and technology. This book provides historical backgrounds, experimental studies, and future perspectives on the use of computing tools to prevent and deal with physical, psychological and social problems that impact society as a whole.

Topics Covered:

- Corporate social responsibility
- Cross cultural virtual learning environments
- Cyberbullying model for a social network
- Designing usable security feedback
- Distributed and collaborative environments supporting emergency and relief activities
- Investigating digital child pornography
- Preventing and reducing social discrimination
- Technological approaches for hate crimes
- Technology for dealing with crimes against children
- Using ICT to foster human right defense processes
