Human Development and Global Advancements through Information Communication Technologies: New Initiatives

Susheel Chhabra (Lal Bahadur Shastri Institute of Management, India)
and Hakikur Rahman (University of Minho, Portugal)

Technology's role in facilitating and furthering human development is of equal significance to its role in promoting inequality and tension between groups and individuals.

Human Development and Global Advancements through Information Communication Technologies: New Initiatives investigates the role of ICT in advancing economic, social, and political development as well as the potential setbacks experienced as a result of introducing new initiatives. This publication offers strategies for continued societal growth through technology and provides historical perspectives on the processes, procedures, and behaviors that have been impacted as a result of ICT programs.

Topics Covered:

- Accessibility to e-government
- Collaborative learning
- Community development
- Culture and language learning
- Digital divide
- E-government management
- ICT for human development
- Network cooperation
- Sustainable IT education
- Trust and technology in business
