Recent Advances in Broadband Integrated Network Operations and Services Management

Varadharajan Sridhar (Sasken Communication Technologies, India) and Debashis Saha (Indian Institute of Management (IIM) Calcutta, India)

As we continue to witness global macroeconomic downturn in many parts of the world, an evolution of some sorts is slowly happening in telecommunications, much as the same witnessed prior to the Dot-com era. There has been a huge paradigm shift in the Data Communication and Networking (DCN) technology from an orderly, predictable, moderate but-steady growth industry to a chaotic marketplace of disruptive technologies, rapidly changing regulations, complex mergers and acquisitions, and inorganic growth.

Recent Advances in Broadband Integrated Network Operations and Services Management covers the principles of both wired and wireless communications of voice, data, images, and video and the impact of their business values on the organizations in which they are used. This reference book includes theoretical and practical works, relevant case studies, topical surveys, and research articles that address problems faced by telecommunication service providers, equipment manufacturers, enterprises, and policy makers in the areas of data communications and networking.

Topics Covered:

- Adoption and Diffusion of Networking Technologies
- Business Applications of Telecommunications
- Business Implications of Public WWANS and WLANS Deployment
- Business Re-Engineering Issues Associated with Networking
- Cross-Border Network-Based Information Systems
- Designing, Deploying, and Using Networked Systems in Specialized Sectors
- Effects of Legislation and Regulation on Telecommunications
- Emerging Networking Trends
- Frameworks for Wireless Security

ISBN: 9781609605896; © 2011; 370 pp.
Print: US \$180.00 | Perpetual: US \$255.00 | Print + Perpetual: US \$360.00

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Varadharajan Sridhar is a professor in information management at the Management Development Institute (India) and is currently a visiting research fellow at Sasken Communication Technologies (Bangalore, India). He received his BE from the University of Madras (India), Post Graduate Diploma in industrial engineering from the National Institute for Training in Industrial Engineering (Mumbai, India), and PhD in MIS from the University of Iowa (USA). He had taught at Ohio University and American University in the US; University of Auckland in New Zealand, and at the Indian Institute of Management (Lucknow, India). Dr. Sridhar's primary research interests are in the area of telecommunication management and policy and global software development. He has published many research articles, business cases, and chapters in edited books in his area of research. Dr. Sridhar is a member of the Committee on Allocation and Pricing of Spectrum for Access Services set-up by the Indian Government. He was the recipient of the Nokia Visiting Fellowship awarded by the Nokia Research Foundation. He is on the editorial board of the *Journal of Global Information Management* and is a member of ACM and AIS.

Chapter 1

Fairness Analysis and Improvement of Transport Layer Protocols

Tegze D. (Budapest University of Technology and Economics)
Hosszú G. (Budapest University of Technology and Economics)
Kovács F. (Budapest University of Technology and Economics)

Chapter 2

Rembasy:

Formoso Vreixo (University of A Coruña, Spain)
Cacheda Fidel (University of A Coruña, Spain)
Carneiro Víctor (University of A Coruña, Spain)
Valiño Juan (University of A Coruña, Spain)

Chapter 3

Fourier-Based Assessment Strategies for Simulated Ad Hoc Networks

Fazio M. (Università di Messina, Italy)
Villari M. (Università di Messina, Italy)
Puliafito A. (Università di Messina, Italy)

Chapter 4

Comparison of Policies for Epidemic Broadcast in DTNs under Different Mobility Models

Giudici Francesco (Università degli Studi di Milano, Italy)
Pagani Elena (Università degli Studi di Milano, Italy)
Rossi Gian Paolo (Università degli Studi di Milano, Italy)

Chapter 5

On the Impact of Network Dynamics on a Discovery Protocol for Ad-Hoc Networks

Fei Liu (University of Twente, the Netherlands)
Geert Heijenk (University of Twente, the Netherlands)

Chapter 6

Models and Architecture for Autonomic Network Management

N. Van Wambeke (Centre National de la Recherche Scientifique and Université de Toulouse, France)
F. Armando (Centre National de la Recherche Scientifique and Université de Toulouse, France)
A. Abdelkefi (Centre National de la Recherche Scientifique and Université de Toulouse, France)
C. Chassot (Centre National de la Recherche Scientifique and Université de Toulouse, France)
K. Guennoun (Centre National de la Recherche Scientifique and Université de Toulouse, France)
K. Drira (Centre National de la Recherche Scientifique and Université de Toulouse, France)

Chapter 7

Reservation MAC Protocols for Ad-Hoc Networks:

Boudour Ghalem (IRIT - Paul Sabatier University, France)
Teyssié Cédric (IRIT - Paul Sabatier University, France)
Zoubir Mammeri (IRIT - Paul Sabatier University, France)

Chapter 8

Slot Allocation Algorithms for Minimizing Delay in Alarm-Driven WSNs Applications

Macedo Mário (INESC-ID, Portugal)
Grilo António (INESC-ID, Portugal)
Nunes Mário (INESC-ID, Portugal)

Chapter 9

Shared Transport for Different Radio Broadband Mobile Technologies

Li Xi (University of Bremen, Germany)
Weerawardane Thushara (University of Bremen, Germany)
Zaki Yasir (University of Bremen, Germany)
Görg Carmelita (University of Bremen, Germany)
Timm-Giel Andreas (Hamburg University of Technology, Germany)

Chapter 10

Strategic Scenarios for Fixed-Mobile Convergence:

Harno Jarmo (Aalto University School of Science and Technology, Finland)
Kumar K.R.Renjish (Aalto University School of Science and Technology, Finland)
Heikkinen Mikko V.J. (Aalto University School of Science and Technology, Finland)
Kind Mario (Deutsche Telekom, Germany)
Monath Thomas (Deutsche Telekom, Germany)
von Hugo Dirk (Deutsche Telekom, Germany)

Chapter 11

Subscription Policy Control Framework for IMS-Based Networks

Nasser Nidal (University of Guelph, Canada)
Shang Ming (University of Guelph, Canada)

Chapter 12

What Happened to Preferences for Next Generation Internet?

Shiau Wen-Lung (Ming Chuan University, Taiwan)
Chung Chen-Yao (National Central University, Taiwan)
Hsu Ping-Yu (National Central University, Taiwan)

Chapter 13

On Demand Bandwidth Reservation for Real-Time Traffic in Cellular IP Network using Particle Swarm Optimization

Anbar Mohammad (Jawaharlal Nehru University, India)
Vidyarthi D.P. (Jawaharlal Nehru University, India)

Chapter 14

Mobile Division Query Processing Incorporating Multiple Non-Collaborative Servers

Lim Say Ying (Monash University, Malaysia)
Taniar David (Monash University, Australia)
Srinivasan Bala (Monash University, Australia)

Chapter 15

A Survey on Classical Teletraffic Models and Network Planning Issues for Cellular Telephony

Barcelo-Arroyo Francisco (Universitat Politècnica de Catalunya, Spain)
Martin-Escalona Israel (Universitat Politècnica de Catalunya, Spain)

Chapter 16

Testbed Implementation of a Pollution Monitoring System Using Wireless Sensor Network for the Protection of Public Spaces

Roy Siuli (Indian Institute of Management Calcutta, India)
Anurag D (Indian Institute of Management Calcutta, India)
Bandyopadhyay Somprakash (Indian Institute of Management Calcutta, India)

Chapter 17

A GPS Based Deterministic Channel Allocation for Cellular Network in Mobile Computing

Khanbary Lutfi Mohammed Omer (Aden University, Yemen)
Vidyarthi Deo Prakash (Jawaharlal Nehru University, New Delhi, India)

Chapter 18

Energy-efficient Scalable Self-organizing Routing for Wireless Mobile Networks

Moh Melody (San Jose State University, USA)
Lin Xuquan (Echelon Corporation, USA)
Dhar Subhankar (San Jose State University, USA)
