Felix B. Tan (Auckland University of Technology, New Zealand)

Today's businesses are more geographically dispersed than ever and organizations continue to explore the benefits of operating virtually, necessitating continued research on global information management.

International Enterprises and Global Information Technologies: Advancing Management Practices offers solutions, best practices, and case studies on information management on a global scale among developed, developing, and emerging nations. Organizational and managerial implications are explored in-depth, making this publication essential for researchers and professionals who need to understand the mechanics of today's global business environment.

Topics Covered:

- Business Process Outsourcing
- Global Software Development
- ICT Use and Satisfaction
- Impact of Culture on Technology Use
- Knowledge Management Systems Diffusion
- Managing Knowledge Transfer
- Mobile Internet Services
- Organizational Communication
- Strategic Alignment
- Understanding IT Governance

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.
